

Hamilton Beach® Commercial's Single-Cup Hospitality Coffeemaker

Better-Tasting Coffee, Quick Cleanup, No Glass Carafe, Energy Efficient and a Small Footprint, Too

Hamilton Beach® Commercial's hospitality coffeemaker brews great-tasting coffee for hotel guests while saving their hosts space, energy and time.

Housekeeping staff will save precious minutes with the hospitality coffeemaker's fast and easy cleanup. The permanent brew basket is easily rinsed or, with optional disposable brew baskets, simply thrown out. There are no glass carafes to clean or break. Pod coffeemaker brews directly into 8-ounce, 10-ounce or 12-ounce mugs or disposable cups, reducing messy coffee grounds and pouring spills.

The patent-pending brew basket is designed to pull more flavor from any standard single-cup coffee or tea pod. The front-loading design of the brew basket minimizes the need to touch the brewing area of the coffeemaker for improved sanitation.

This coffeemaker, one of the most compact on the market, can fit into tight spaces with room to spare for cups and accessories. The energy efficient, 500-watt heater brews coffee quickly (less than 3 minutes), reducing energy costs. The unit automatically shuts off after brewing.

Other features include a durable "on" button with a light, cord storage, UL listing for commercial use and 1-year limited warranty. An optional tray, custom built for the hospitality coffeemaker, is available (Model CT200B)

KEY FEATURES

Better-Tasting Coffee/Tea — Brew basket design for optimal extraction of flavor from any standard single-cup coffee or tea pod.

Saves Housekeeping Time — Pod brewing with easy-to-clean brew basket or optional disposable brew baskets. No glass carafe to clean or break. Brews directly into 8-ounce, 10-ounce or 12-ounce mugs or disposable cups.

Energy Efficient — Using only a 500-watt heater, it brews coffee in less than three minutes. The hospitality coffeemaker shuts off automatically after brewing.

Compact Design — Compact footprint fits in tight spaces and allows more room for cups and accessories. Optional compact tray, custom-designed for the hospitality coffeemaker, is equally compact and displays pods upright. The tray has separate sections for coffeemaker, cups, coffee and condiments.

Sanitary Loading — Front-loading design minimizes hand contact with brewing basket.

Other Features — Durable "on" button, cord storage, UL listed for commercial use. Collapsible brew basket reduces waste.

Warranty — One-year limited warranty.
