

# Hamilton Beach® Commercial's New Tempest™ Blender Combines Power and Performance

Hamilton Beach® Commercial has re-designed the Tempest™ blender with power and performance in mind. For ultimate flexibility, operators can choose from traditional high and low speeds or jump cycle (which starts in low speed, then ramps up to high).

Ordinary blenders spin contents around the walls of the container leaving whole chunks untouched by the blades. With the Wave~Action™ system from Hamilton Beach®, the contents are pulled down into the blades for smooth results every time. Blend a daiquiri, margarita, or any popular icy drink and serve it up – perfectly smooth and with no ice chunks.

Additional features include a 64 oz. stackable container, a timer with automatic shutoff to prevent over blending and a jar pad sensor, which turns the motor off when the container is not in place to help prevent “wear and tear” from misuse. The 3 hp motor combines efficient, excellent blend quality with quiet operation, and the blenders durable performance is backed by a 2 years or 20,000 cycles, parts and labor warranty, whichever comes first.

## KEY FEATURES

**Powerful Performance** – 3 Hp motor built with a durable all-metal drive coupling to satisfy the demands of the busiest bars.

**Wave~Action™ System** – Unique Wave~Action™ system delivers uniformity from top to bottom. No large chunks of fruit or ice floating on top, and no need for stir sticks.

**Jar Pad Sensor** – Turns the motor off when the container is not in place to help prevent “wear and tear” from misuse.

**Temperature Gauge** – Alerts operator if motor overheats to help prevent unnecessary burnout.

**Controls** – 2 speeds, jump cycle, timer, and pulse.

**64 Oz. Stackable Container** – Made of break-resistant polycarbonate with easy-to-read measurement marks.

**Warranty** – Two years parts & labor or 20,000 cycles, whichever comes first. Covered under the Express Care Service Program. See website for details.

**Model:** HBH650
